PROFILE

Dynamic and dedicated Software Engineering student with hands-on experience in web development gained through an internship at IBM SkillBuild. Currently pursuing B.Tech in Computer Science and Engineering from the University of Calcutta. Proficient in coding and skilled in MySQL, with a strong foundation in web development principles. Proactive learner, continuously seeking to expand knowledge in emerging technologies, best practice, and industry trends in C.S.E.

EXPERIENCE

IBM SkillBuild (CSRBOX)   June-July 2023

Garbage Collector

Created "Garbage Collector" website and mobile application, enabling users to place orders for garbage collection. Implemented features to assign partners based on location and reward system for users.

- Role: Designed all web pages using HTML and CSS for the 'GC' project.
- Archievements-solving and debugging skills, honed through hands-on experience in identifying and resolving coding isuues.

Projects   2023-2024

NotePad Application

Designed and implemented a lightweight text editor similar to the Windows Notepad application using Java Swing. This project aimed to provide essential text editing features with a simple and intuitive user interface.

- Role: Lead developer responsible for the project's architecture, coding, and testing.
- Achievements: successfully created a functional text editor with features like text formatting, file saving and opening.

Journal Management System

The Journal Management System is a web-based platform designed to streamline the process of academic manuscript submission, review, and publication. The system provides a user-friendly interface for authors, editors, and reviewers, facilitating efficient communication and collaboration throughout the publication process.

- Role: Designed all web pages using HTML and CSS for the JMS project.
- Archievements: solving and debugging skills, honed through hands-on experience in identifying and resolving coding isuues.
